

**INCIDENT MANAGEMENT SITUATION REPORT  
TUESDAY, JULY 12, 2005 – 0530 MDT  
NATIONAL PREPAREDNESS LEVEL 2**

**CURRENT SITUATION:**

Initial attack activity was light nationally with 128 fires reported. Four new large fires were reported, one each in the Southwest, Southern, Alaska and Eastern Great Basin Areas. Three large fires were contained, one each in the Southwest, Western Great Basin and Eastern Great Basin Areas. Very high to extreme fire indices were reported in Alaska, Arizona, California, Colorado, Idaho, Nebraska, New Mexico, Nevada, South Dakota, Texas, and Utah.

**ROCKY MOUNTAIN AREA INCIDENTS / LARGE FIRES:**

RICCO, Black Hills National Forest. A Type 1 Incident Management Team (Martin) is assigned. This fire is two miles south of Piedmont, SD in ponderosa pine, logging slash, and grass. North and South High Meadows, Indian Hills, Little Elk Creek, Stagebarn and Piedmont subdivisions remain threatened. Evacuation orders have been lifted for all communities except Lower High Meadows. Structure protection remains in place. The South Stagebarn Canyon Botanical Area and archeological sites remain threatened. Fire activity was limited to creeping and backing on the north and south portions of the fire. Small groups of trees burned more actively on the west side.

MASON, Pike San Isabel National Forest and Grasslands. A transfer of command from a Type 2 Incident Management Team (Mullenix) to a Type 1 Incident Management Team (Krugman) will occur today. Mullenix's Team will remain to assist in community relations. This fire is two miles south of Wetmore, CO in timber, heavy brush and hardwood litter. The communities of Beulah, Bears Head Ranch, the Siloam Road subdivision, and Billingsly Ranch remain threatened and have been evacuated. Structure protection is in place. Greenwood subdivision residents have been allowed to return to their homes. Poor vehicle access, steep, broken terrain and drought stressed fuels continue to hamper containment efforts. Isolated torching, creeping and backing fire activity were reported.

PACK TRAIL, White River Field Office, Bureau of Land Management. A Fire Use Management Team (Cook) is assigned. This lightning-caused Wildland Fire Use (WFU) incident is being managed to accomplish resource objectives. The fire is burning 10 miles west of Meeker, CO in timber litter, brush and hardwood slash. Creeping and isolated torching were observed.

RIO BLANCO, San Juan National Forest. A Fire Use Management Team (Hahnenberg) is assigned. This lightning-caused Wildland Fire Use (WFU) incident is being managed to accomplish resource objectives. The fire is burning 10 miles southeast of Pagosa Springs, CO in mixed conifer with oak understory. The fire continues to burn out heavy fuels within the perimeter.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD	ORIGIN OWN

### **SOUTHWEST AREA INCIDENTS / LARGE FIRES:**

FLORIDA, Coronado National Forest. This fire is 36 miles south of Tucson, AZ in brush, timber litter and understory. A Type 2 Incident Management Team (Raley) is assigned. Spotted Owl, migratory bird habitat and the Mt. Wrightson Wilderness area remain threatened. Uphill runs and crowning were reported south of McCleary Peak, with backing fire activity on other portions of the fire.

DRAGON COMPLEX, Grand Canyon National Park. A transfer of command from a Fire Use Management Team (Clark) to another Fire Use Management Team (Cones) will occur today. This lightning-caused Wildland Fire Use (WFU) complex, comprised of the Dragon, Spine, Basin and Marble fires is being managed to accomplish resource objectives. The complex is 10 miles north of Grand Canyon Village, AZ in mixed conifer, ponderosa pine, aspen and dead and down fuel. Decreased winds reduced fire activity, with occasional torching reported.

NORTH GILA COMPLEX, Gila National Forest. A Fire Use Management Team (Hall) is assigned. This lightning-caused Wildland Fire Use (WFU) complex, comprised of the Fork and Johnson fires, is being managed to accomplish resource objectives. The complex is 13 miles southeast of Reserve, NM in mixed conifer, grass and timber understory. The Fork fire continues to back into Sheppard Canyon. Creeping, smoldering and isolated torching were observed on the Johnson fire.

FLUTED ROCK, Navajo Regional Office, Bureau of Indian Affairs. This fire is five miles west of Sawmill, AZ in pinyon, juniper, sagebrush and grass. No new information was reported.

COOPER, Gila National Forest. This fire is 20 miles east of Glenwood, NM in logging slash, timber litter and understory. No new information was reported.

OSHA PARK, Carson National Forest. This fire is 10 miles east of Taos, NM in timber litter and understory. Watershed, timber and heritage resources are threatened. No further information was received.

SUNFLOWER, Apache-Stigreeves National Forest. This fire is 12 miles northeast of Clifton, AZ in pinyon, juniper, chaparral and grass. Creeping and smoldering were reported. The fire is being monitored from the air.

### SOUTHERN AREA INCIDENTS / LARGE FIRES:

HURRICANE DENNIS RESPONSE, Federal Emergency Management Agency (FEMA). A Type 1 Incident Management Team (Custer) and a Florida State Type 1 All-Risk Incident Management Team (Koehler) are assigned to Duke Field at Eglin Air Force Base, FL. A Type 1 Incident Management Team (Quesinberry) and a Florida State Type 1 All-Risk Incident Management Team (Hill) are assigned to Saufley Field at Pensacola Naval Air Station, FL. A Type 1 Incident Management Team (Feser) is assigned to Maxwell Air Force Base, AL. The Teams are managing receiving and distribution centers in Florida and Alabama, and are working in cooperation with the National Guard, Army Corps of Engineers, American Red Cross, FEMA and the military.

ONION CREEK II, Texas Forest Service. This fire started on private land 18 miles southeast of Leakey, TX in tall grass. No further information was received.

THREE POINTS, Texas Forest Service. This fire started on private land 20 miles northwest of Ft. Davis, TX in pinyon, juniper and grass. Crews continue to monitor and patrol.

### ALASKA AREA INCIDENTS / LARGE FIRES:

IRISH CHANNEL, Kenai-Kodiak Area Forestry, Alaska Division of Forestry. This fire started on Fish and Wildlife Service land 20 miles southeast of Sterling, AK in hemlock, spruce, hardwoods, and deep timber litter. Smoldering and creeping with backing fire were reported. The fire is being monitored from the air.

CHAPMAN CREEK, Alaska Fire Service, Tanana Zone. This fire is eight miles south of Coldfoot, AK in black spruce and tundra. No new information was reported. This will be the last report unless new information is received.

### OUTLOOK:

**Weather Discussion:** Strong high pressure will continue to build over the West. Over Alaska, a weak trough passing through the area will bring mostly cloudy skies along with some showers to portions of the state.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
<b>Rocky Mountain</b> Scattered afternoon thunderstorms on the southeast plains, otherwise dry. Isolated dry lightning over the Colorado mountains.	Mainly 90's. Eastern Colorado: lower to mid 80's. Mountains: 70's to mid 80's.	Western Colorado: 5 to 15%. Wyoming: 12 to 25%. Elsewhere: 25-35%.	Variable 5 to 15 mph.

<b>Geographic Area Weather</b>	<b>High Temperatures</b>	<b>Minimum Relative Humidity</b>	<b>Wind</b>
<b>Southwest</b> Mostly sunny, hot and very dry in Arizona. Partly to mostly cloudy with isolated thunderstorms in eastern and central New Mexico and west Texas. Scattered dry thunderstorms western New Mexico and eastern Arizona.	Mountains: 70 to 90. Lower elevations: 90 to 112.	Arizona eastward to the Continental Divide: 3 to 15%. From the Continental Divide eastward: 15 to 40%.	West to northwest 5 to 15 mph with gusts to 20 mph from Arizona into the Divide region. Southeast to east winds 10 to 20 mph from the Continental Divide eastward into west Texas.
<b>Western Great Basin</b> Sunny with near record heat and a slight chance for a dry thunderstorm near the Sierra Nevada.	North valleys: 93 to 108. South valleys: 97 to 115. Mountains: 75 to 97.	North valleys: 5 to 22%. South valleys: 3 to 8%. Mountains: 8 to 25%.	Generally upslope / upvalley at 5 to 15 mph.
<b>Southern California</b> Areas of morning low clouds and fog in the coastal areas, otherwise sunny. Becoming partly cloudy with isolated showers and thunderstorms over the mountains and deserts in the afternoon.	Mountains: 85 to 100. Valleys: 95 to 105. Upper deserts: 100 to 110. Lower deserts: 115 to 125.	15 to 30%.	Southeast to southwest 5 to 15 mph.
<b>Alaska</b> Partly cloudy. Chance of showers in the northwest interior.	60's to mid 70's.	Most locations: 35% or higher.	Southwest 5 to 15 mph.
<b>Eastern Great Basin</b> Mostly sunny and hot.	Idaho, Bridger-Teton: Mountains: 72 to 85. Valleys: 87 to 99. Northern Utah: Mountains: 80 to 95. Valleys: 90 to 102. Southern Utah and the Arizona Strip: Mountains: 89 to 99. Valleys: 90 to 107. Deep southwest Utah and Arizona Strip: 105 to 117.	Idaho, Bridger-Teton: Mountains: 11 to 28%. Valleys: 11 to 18%. Northern Utah: Mountains: 28 to 34%. Valleys: 9 to 25%. Southern Utah and the Arizona Strip: Mountains: 14 to 21%. Valleys: 8 to 14%.	Idaho, Bridger-Teton: Upslope/upvalley 3 to 8 mph. Northern Utah: Upslope/upvalley 5 to 10 mph. Southern Utah and the Arizona Strip: Upslope/upvalley 5 to 10 mph.
<b>Northern California</b> Patchy night and morning coastal fog. Otherwise, mostly clear skies.	Coast: 65 to 80. Inland: 88 to 108.	Ranging from 30 to 50% on inland ridges and upper slopes to 65% plus on the coast and in sheltered drainage bottoms.	Northwest to northeast 3 to 10 mph in the morning hours, with local gusts in the Sacramento Valley to the teens. Afternoon sea breezes to 12 mph near the coast. Light slope winds elsewhere.

### EXTENDED ATTACK

After your initial sizeup of the fire and/or transfer of command from an initial attack IC, answer the following questions. Repeat this analysis whenever there is a change, or predicted change, in fire conditions.

- Do you have a current fire weather forecast for the fire location?
- Is the observed fire weather consistent with the forecast?
- Have you established a new organizational structure and communicated it to the other forces associated with the fire?
- Can you control the fire with the resources available (either on the incident or soon to be on the incident) under expected conditions?
- Have you developed a plan to attack the fire?
  - Direct or indirect
  - Anchor points
  - Escape routes
  - Head or flank attack
  - Priority areas
- Have you communicated this to all personnel assigned to the incident, including new arrivals?
- Can you see all of the fire area?
- Can you communicate with everyone on the fire and with dispatch?
- Are escape routes established?
  - If you are using the black, is it completely burned and without a reburn potential?
- Are safety and the standard fire orders being followed?
- Will you contain the fire before the next operational period?
- Have you reported the status of the fire to dispatch?
- Do you have a complete list of what resources have been ordered for the fire?
